

Imeasure-Ebico: monitor your energy - for free!

Are you off to Glastonbury or one of the other festivals this summer? If so, have you ever wondered how much power those big summer festivals use? Well, although your tent is probably not hooked up to a power supply, Glastonbury still uses about 30 megawatt hours of electricity over the weekend - about as much as the city of Bath.

Glastonbury have come up with all sorts of methods to reduce their electricity consumption and so can you! Apart from the many [energy saving tips](#) that we can help you with, how about using our free IMeasure service to monitor your consumption

Summer Survey

Thank you to the thousands of you who took part in the summer survey we published in last month's newsletter. 5 lucky people have won a hamper ready for a glorious summer with lots of picnics; all winners have now been notified. The data is currently being analysed and we will let you have feedback as soon as possible.

Have you heard about the Feed in tariff?

Have you had solar photovoltaic (PV) panels installed on your roof and are now generating your own electricity? Perhaps you have a wind turbine or even hydro power. If so, you can claim the Feed in Tariff through Ebico as well as having Ebico as your supplier for the electricity that you don't generate yourself - read here for more details

[The Feed-in-Tariff](#)

Are you confused about your energy bills or statements?

Are you unsure about when you will receive a bill or statement or if you will receive one at all? We've recently updated the FAQ's section of our website to cover these questions - so why not take a look here

A new partner

We have partnered with Bromsgrove based BDHT to offer customers fairer gas and electricity prices to heat and light their homes. The agreement will see around 3,000 residents in the West Midlands being able to take advantage of fairer energy prices.
