

Smart metering - what's the deal?

We've been getting a lot of questions about smart meters over the past few months so we thought we'd let you know what's going on at the moment.

The last government decided to make electricity and gas supply companies replace all household meters with new, cleverer, models by the end of the decade (2020). The Conservative / Liberal Democrat coalition government has now said that it wants the roll-out of smart meters to be accelerated such that the roll-out to homes starts in the summer of 2012 and everyone has had one fitted by the end of 2016..... More news from Ebico, the UK's only not-for-profit energy supplier

Waterpebble Review

My family and I have been using the water pebble for a week now in an attempt to reduce our water usage - no easy task with three teenagers in the house who seem to think you can only face the world each day once you've lowered the local water table by at least 30'.

The Fairly Green Entrepreneur

Phil Levermore Ebico's founder and managing director has started a new blog - 'The Fairly Green Entrepreneur'. Phil is seeking to start a business venture that tackles fuel poverty as the same time as Climate Change. Follow ['The Fairly Green Entrepreneur'](#) to see how he gets on!

Energy made easy - ensure you receive accurate bills.

To prevent surprisingly high bills turning up on your door-step this winter simply email or call up with up-to-date metering readings regularly. This will ensure that your gas or electricity bill is accurate and your direct debit payments are the appropriate amount each month.

Reduce your fuel consumption with i measure

Did you know that just being aware of how much energy you use can save up to 15% off the average household energy bill?

We have carried out a study with Oxford University, Energy Change Institute and have discovered that[read more](#)....
